There is a large array of methods and ways to do more with AutoCAD, but what is needed and how can one go about it is hard to know without researching. In 2016 and 2017, Autodesk developed a brand new scripting language, AutoLISP, for building and deploying customizations and scripts inside AutoCAD. AutoLISP is built on top of JavaScriptCore, and is able to run on macOS, Windows, and Linux, in addition to being available as an add-on for AutoCAD as well. The code can be custom designed to allow for a smooth integration into the product. Implementations The following software implementations of AutoCAD are listed below

by method of interaction with the program: Desktop applications AutoCAD WS AutoCAD WS is a web service on top of the AutoCAD object model. Its purpose is to allow sharing, managing and creating AutoCAD drawings on a third-party website. It provides both the method of communication with a computer and the ability to load drawings created on the computer by using a web browser. In addition to being used for the more common task of opening and saving drawings, the AutoCAD WS supports CAD and 3D feature-based queries, creating and updating drawing objects, adding and modifying drawings, adding annotations, and also the ability to import CAD geometry as a feature into AutoCAD. When a Web Service solution is not an option, a web-based solution, such as AutoCAD Online, provides similar functionality. AutoCAD Online AutoCAD Online is a web-based solution offered by Autodesk. It is available as a free service or as a paid subscription service. The web-based solution allows users to open and save AutoCAD drawings, as well as create drawings, add

annotations to existing drawings, and use CAD-based features. AutoCAD 360 AutoCAD 360 is a web service on top of the AutoCAD object model. Its purpose is to allow creating and sharing drawings on a 3D web browser. It also allows its users to create and edit drawings, manage annotations, and use CAD-based features. For those of you who are not using windows 2000 or higher, here's how you can

use Autodesk AutoCAD without using Autodesk Activation (misleadingly called 'Autodesk Activation Code' by Autodesk). This Autodesk Activation Alternative may seem unnecessary, but this alternative works perfectly. All Autodesk Activation methods require to sign up a new Autodesk account and use their Activation Code.
