us/fifa-22.Nodal metastasis from GIST: a rare entity after imatinib treatment. Gastrointestinal stromal tumors (GISTs) are mesenchymal tumors and their most common location is the gastrointestinal (GI) tract. In approximately 70% of the cases, GISTs arise from the muscular layer of the GI tract, while 10% arise from the submucosa. From a pathological viewpoint, the predominant subtype of GIST is a spindle cell tumor, which can be smooth muscle cell tumor or leiomyoma. Another subtype, the epithelioid variant, is extremely rare. Due to the high risk of metastasis, surgery is the most effective treatment for GISTs. Generally, the most common sites of distant metastasis are the liver and lung. To date, complete surgical resection is the only curative treatment for metastatic lesions. The most common site of non-operable metastatic lesions is the liver. In some cases, metastatic lesions may be

resectable with complete surgical resection. Imatinib, a selective inhibitor of the KIT receptor tyrosine kinase, has changed the treatment of GIST. About 40% of patients achieve partial response to imatinib therapy, and the remaining 60% achieve no response or even progression after several months of imatinib therapy. Up to now, there has been no report of metastatic lesions in the abdominal cavity after imatinib treatment. Herein, we report the first case of nodal metastasis from GIST that received the patients' best response to imatinib treatment. It

FIFA 22 makes its way to platforms that demand the very best sports games. New visuals and animations, attention to detail across all areas of the game, and longer passing distances are just a few of the ways in which Fifa 22 lives up to the high standards of FIFA.

- **Improved assist system**

FIFA 22 introduces improvements to the assist system in all game modes. Players will now consistently follow more passes - even through the *out of bounds* wall. Improved animations and authentic player movement make the crucial pass more fluent.

Having proved a valuable tool in the single player season mode, we are introducing our first exciting new feature for the online multiplayer community to enjoy: Online Matches. Whether you're teamed up against your friends or join up with a bunch of strangers to compete against other human players, you'll see and feel the difference.

- **Dynamic Sides**

With Dynamic Sides enabled, FIFA 22 matches now come with an additional dynamic component. We've taken the core elements of each match, and turned them into sides, and we will be using the most popular match-ups and formations to determine which might be your favourite. Create or start a side and challenge other players all across the globe, all through one single mode.

- **Create or join a side**
