What's New in the AutoCAD?

Added AutoCAD Layer Manager to the right-click menu. (video: 4:15 min.) Let's look at AutoCAD 2023 in more detail. It introduces some major changes, but there are also several enhancements and new features. In-place editing Prior to AutoCAD 2023, you had to draw a new shape or perform a create/modify operation in an external application. The latest version of AutoCAD provides in-place editing. You can add a line, polyline, circle, rectangle, or more complex shape directly to the current layer. In-place editing enables you to update your design in the same manner as creating a drawing. A line or polyline can be added to the drawing automatically when you change one of its attributes. When you start the editing process, a dialog box appears with the name of the current layer. You can rename that layer. Layers can also be sorted or sorted by name and layer size. The sorting option displays icons next to the layers. The icons represent a quick glance at layer properties. You can sort by the size of each layer, its drawing order, and the time it was last modified. You can also display multiple layers at the same time and view them on a separate window. To perform in-place editing, select one or more layers in the Layers dialog box (Figure 1). The dialog box changes to reflect the names of the selected layers. You can add lines, polygons, circles, or more complex shapes to the drawing. Figure 1. Layers dialog box. Editing in the Layers dialog box. It's important to keep in mind that you don't edit layers by making the objects on them visible or invisible. You can only edit a layer by adding, removing, or modifying shapes. The following dialog boxes appear as you edit layers. Figure 2. Editing a layer. When you're finished, click the OK button to complete the process. Figure 3. In-place editing for a layer. You can move the drawing to a different location or to a different file. In the Layers dialog box, you can select the Arrange toolbar button (Figure 4). On the shortcut menu, select Move To. The Move dialog box appears (Figure 5). Figure 4. Right-click the Ar
