# Autodata 3 45 Keygen Only [UPD]

[Download](#)

---

Hi guys, installed according to the instructions, but I got stuck on GetUID - it keeps returning 00000000 no matter what I do. No antivirus or UAC is used. No... I would like to help. Thank you very much for your patience. Question: I have two tables, one is called "Student" and the other is called "Projects". Students and projects are different people. I'm creating a "Student" table and adding students with a specific name and ID to it, which will be in the "Projects" table. I created three queries that I would like to use, where the query is "Student", the query is "Projects", and the query is "Projects.StudentID".
